Art Unit: 2652

Claims 1 to 33 are pending.

***Election/Restrictions***

1. Applicant's election without traverse of the invention of Group I, claims 1 to 33, in the reply filed on 4-11-2005 is acknowledged. Non-elected claims 34 to 52 have been canceled by applicant.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Drawings***

3. The drawings are objected to because of poor line quality and some figures such as 3 to 7 are too dark to see details clearly. The Examiner acknowledges that the scanning process at the PTO may have contributed to this problem, but whatever the cause, the present figures are unacceptable. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be

necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3, 7, 13, 15-18, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujii et al (U.S. 6,653,761). Fujii discloses a microactuator attached 16 to a suspension 18 wherein the microactuator includes a bonding agent in the form of a first adhesive 46 and a second adhesive (note column 7 – line 38) which may be considered the claimed coating application. It is noted that the open nature of the claim language, i.e., the use of the term comprising, allows for the presence of the movable electrode 26 between the two adhesives. It is also noted that the claim language does not establish the application site as being directly on the suspension. The second adhesive may be an epoxy (column 7 – line 34). The microactuator and suspension of

Fujii are utilized in a disk drive in which a slider 20 supporting a magnetic head reads from a hard disk.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 6 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujii et al.

Fujii does not expressly disclose the Young's modulus of his epoxy second adhesive.

Official Notice is given that it was notoriously old and well known in the art for an epoxy adhesive to have a Young's modulus greater than 0.6G Pa.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the epoxy second adhesive of Fujii have a Young's modulus greater than 0.6G Pa. The motivation would have been: the claimed range includes values commonly attributed to epoxy adhesives utilized in the art.

***Allowable Subject Matter***

8. Claims 4, 5, 8-12, 14, 19, 20, and 23-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
